Audit Report

Stage 2/Surveillance/Recertification/Special Audit, (On-site or Virtual)

1. Organization & Audit Details

1.1	**Organization Name**	BRBA INFRATECH LLP		
1.2	**Address**	Registered Address: DRM Chowpathy, Alipurduar Junction, Alipurduar, Jalpaiguri, West Bengal – 736123, India Work Address: Birpara, Panbari, Alipurduar, West Bengal – 736121, India		
1.3	**Contact Person**	Ratan Kumar Dubey	**Contact Details**	9434228758
1.4	**Type of the audit**	Surveillance I	**Email ID**	ratandubey08@gmail.com
1.5	**Audit Standard(s)**	ISO 9001:2015		
1.6	**Scope of Certification**	FABRICATION OF VARIOUS TYPE OF BRIDGE GIRDER AND STEEL STRUCTURE WORK		
1.7	**Applicable IAF / EA Code**	35		
1.8	**Language of audit:**	English / Hindi		
1.9	**Audit Dates**	26.03.2025 to 26.03.2025		

2. Audit Team Details

Name	Role	Contact Details	Standard(s)	EA Code	Audit Mandays
Ankit Lal	Lead Auditor	ankitllal2324@gmail.com	ISO 9001:2015	35	1

Audit Objectives	To determine the capability and effectiveness of the organization's management system to ensure continual compliance with customer, statutory and regulatory requirements and in meeting its specified objectives and the conformity of the management system to stated criteria.
Brief about the organization	BRBA INFRATECH LLP is engaged in the fabrication of various types of bridge girders and steel structure works. The organization operates from its work location at Birpara, Panbari, Alipurduar, West Bengal – 736121, India, with its registered office at DRM Chowpathy, Alipurduar Junction, Alipurduar, Jalpaiguri, West Bengal – 736123, India. Its activities include material procurement, cutting, fabrication, welding, assembly, inspection, handling, storage and dispatch of fabricated bridge girders and structural steel components. The organization has implemented a Quality Management System in accordance with ISO 9001:2015 to maintain process control, product conformity, customer satisfaction and continual improvement.
Audit Criteria	Performance monitoring, measuring, reporting and review against key performance objectives and targets. Details on the client's management system and performance with regards to legal compliance. Operation control of the client's processes. Internal audits and management review, and Normative References on management systems.

Any deviation from the audit plan and their reasons	**NO**
Any significant issues impacting on the audit programe;	**NO**
Significant changes, if any, that affect the management system of the client since the last audit took place	**NO**

For surveillance/Recertification/Special Audit, verify the following: Nil

- Closure of Previous NC & its effectiveness: No
- Compliance of use of QCC logo/marks & Applicable AB logo / marks, if applicable: No
- Any changes with respect to management system: No
- Any Complaints (interested party feedback): No
- Any Change in Scope: No
- Any additional Information: No

Proposed Audit Date for	**03-08-2027**	1 Surveillance/SCE-certification Audit (After 11 months of Stage 2 audit/___ surveillance audit)	**YES**

Non-Conformities Raised:

Minor Non-conformance	**0**
Major Non-conformance	**0**
Observation identified	**1**

3. Overview of identified non-conformities

S.No.	Management System Standard	Details of NC's	Type of NC	Clause No.	Total NC (Nos.)

S.No.	Opportunities for improvement	Management System Standard	Relevant Clause No.
	N/A	ISO 9001:2015	

S.No.	Observation's	Management System Standard	Relevant Clause No.
1	The organization may strengthen its competence monitoring process by ensuring periodic competency evaluation records are updated for all relevant fabrication and welding personnel.	ISO 9001:2015	7.2

Clause	Clause Description	C/NC/O /OFI	Surveillance I

4	**Context of the organization.** **4.1 Understanding the organization and its context** **4.2 Understanding the needs and expectations of interested parties** **4.3 Determining the scope of the quality management system.** **4.4 Management system and its processes**	**C**	The organization has identified relevant internal and external issues such as skilled manpower, fabrication capability, welding quality, machinery availability, material supply, customer specifications, statutory requirements and market conditions. Interested parties including customers, employees, suppliers, management, contractors and regulatory authorities have been identified along with their applicable needs and expectations. The QMS scope is defined as “Fabrication of Various Type of Bridge Girder and Steel Structure Work.” The organization has established and maintained key processes including enquiry and order review, procurement, material inspection, cutting, fabrication, welding, assembly, inspection, storage and dispatch, with defined responsibilities and controls. During the audit, the organization’s context, interested-party requirements, QMS scope and process interactions were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-QM-01 QMS Manual; BRBA-IER-01 Internal & External Issues Register; BRBA-IPR-01 Interested Parties Register; BRBA-QSS-01 QMS Scope Statement; BRBA-PIM-01 Process Interaction Matrix; BRBA-ROR-01 Risk & Opportunity Register.
5.1	**Leadership and commitment** **5.1.1 General** **5.1.2 Customer focus**	**C**	Top management demonstrated leadership and commitment by establishing QMS objectives, providing required resources, assigning responsibilities and reviewing process performance. Customer requirements relating to drawings, specifications, quality, delivery and other applicable conditions are identified and addressed through order review, production control and customer feedback processes. During the audit, management involvement and customer-focused controls were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-QM-01 QMS Manual; BRBA-QO-01 Quality Objectives; BRBA-CRR-01 Customer Requirement Register; BRBA-CFCR-01 Customer Feedback & Complaint Register; BRBA-MRM-01 Management Review Minutes.
5.2.	**Policy** **5.2.1 Establishing the policy** **5.2.2 Communicating the policy**	**C**	The organization has established a Quality Policy appropriate to its bridge girder and steel structure fabrication activities, with commitments to meeting customer and applicable requirements and continual improvement of the QMS. The policy is communicated through display, induction, training and internal communication and is made available to relevant interested parties as applicable. During the audit, the Quality Policy and evidence of communication were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-QP-01 Quality Policy; BRBA-TR-01 Training & Awareness Record; BRBA-EAR-01 Employee Awareness Record; BRBA-MRM-01 Management Review Minutes.
5.3.	**Roles, Responsibilities and authorities**	**C**	The organization has defined and communicated roles, responsibilities and authorities for relevant functions involved in management, procurement, fabrication, welding, quality control, stores, maintenance and dispatch. Responsibility for maintaining QMS conformity, monitoring process performance, meeting customer requirements and reporting QMS results has been assigned to appropriate personnel. During the audit, organizational responsibilities and reporting arrangements were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-ORG-01 Organization Chart; BRBA-JD-01 Job Descriptions; BRBA-RRM-01 Roles & Responsibility Matrix; BRBA-QM-01 QMS Manual.

6.1	**6.1 Actions to address risks and opportunities**	**C**	The organization has identified risks and opportunities related to material quality, welding defects, dimensional variation, machinery breakdown, delayed supplies, customer specifications and delivery commitments. Appropriate controls and action plans are defined to reduce identified risks and improve process performance. During the audit, risk assessment and related action records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-ROR-01 Risk & Opportunity Register; BRBA-RA-01 Risk Assessment Record; BRBA-RAP-01 Risk Action Plan; BRBA-MRM-01 Management Review Minutes.
6.2	**6.2 Objectives and planning to achieve them**	**C**	The organization has established measurable quality objectives related to fabrication quality, reduction of welding and dimensional defects, timely completion of work, customer satisfaction and improvement in process performance. Responsibilities, resources, target timelines and monitoring methods have been defined for achieving these objectives. During the audit, quality objectives and related monitoring records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-QO-01 Quality Objectives; BRBA-QAP-01 Quality Objective Action Plan; BRBA-PPMR-01 Process Performance Monitoring Record; BRBA-MRM-01 Management Review Minutes.
6.3.	**QMS-Planning of Changes**	**C**	The organization has established controls for planning and implementing changes affecting the QMS. Changes related to fabrication methods, welding procedures, machinery, manpower, materials, customer drawings/specifications and documented information are reviewed before implementation to ensure required resources, responsibilities and potential impacts are considered. During the audit, selected change records were reviewed and found to be adequately controlled. Documents Reviewed: BRBA-MOC-01 Management of Change Record; BRBA-CR-01 Change Request Record; BRBA-ROR-01 Risk & Opportunity Register; BRBA-MRM-01 Management Review Minutes.
7.1.	**Resources** **7.1.1 General** **7.1.2 People** **7.1.3 Infrastructure** **7.1.4 Environment for the operation of processes** **7.1.5 Monitoring and measuring resources** **7.1.6 Organizational knowledge**	**C**	The organization has identified and provided the resources required for effective implementation of the QMS, including competent personnel, fabrication and welding equipment, handling facilities, utilities, inspection instruments and suitable workplace conditions. Infrastructure such as cutting, welding, lifting, storage and inspection facilities is maintained to support bridge girder and steel structure fabrication activities. Monitoring and measuring equipment is identified, calibrated or verified as applicable, and records are maintained. Required organizational knowledge related to fabrication methods, welding practices, drawings, specifications, inspection criteria and customer requirements is maintained through procedures, experience and training. During the audit, resource availability, infrastructure, work environment, measuring equipment and organizational knowledge controls were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-RP-01 Resource Planning Record; BRBA-HRMR-01 Human Resource & Manpower Record; BRBA-IMR-01 Infrastructure & Maintenance Register; BRBA-WEC-01 Work Environment Checklist; BRBA-MER-01 Monitoring & Measuring Equipment Register; BRBA-CAL-01 Calibration Records; BRBA-OKR-01 Organizational Knowledge Register.

7.2	**Competence**	**O**	The organization has defined competency requirements for personnel involved in fabrication, welding, inspection, maintenance and other QMS-related activities. Competence is ensured through education, experience, skill, training and applicable qualification records. During the audit, selected competency and training records were reviewed. The competency requirements were generally maintained; however, periodic competency evaluation records for a few fabrication personnel were not consistently updated. Observation: The organization may strengthen its competence monitoring process by ensuring periodic competency evaluation records are updated for all relevant fabrication and welding personnel. Documents Reviewed: BRBA-CM-01 Competency Matrix; BRBA-TR-01 Training Records; BRBA-TNP-01 Training Need Plan; BRBA-TEF-01 Training Effectiveness Evaluation; BRBA-JD-01 Job Descriptions.
7.3	**Awareness and training**	**C**	The organization ensures that personnel are aware of the Quality Policy, relevant quality objectives, customer requirements, product quality criteria and their contribution to QMS effectiveness. Training and awareness activities are conducted based on identified needs, including fabrication quality, welding practices, inspection requirements and applicable work instructions. During the audit, selected awareness and training records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-TR-01 Training Records; BRBA-TNP-01 Training Need Plan; BRBA-EAR-01 Employee Awareness Record; BRBA-TEF-01 Training Effectiveness Evaluation.
7.4	**Communication (Internal & External)**	**C**	The organization has established methods for internal and external communication relevant to the QMS. Internal communication is carried out through meetings, work instructions, notices and departmental coordination, while external communication with customers, suppliers, contractors and other interested parties is managed through email, telephone, purchase orders, drawings and formal correspondence. During the audit, communication methods and related records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-CM-01 Communication Matrix; BRBA-MOM-01 Meeting Minutes; BRBA-ICR-01 Internal Communication Record; BRBA-ECR-01 External Communication Record.
7.5.	**Documented information**	**C**	The organization has established and maintained documented information required for effective implementation of the QMS. Documents are identified, reviewed, approved, updated and controlled to ensure correct versions are available at relevant points of use. Obsolete documents and records are suitably controlled to prevent unintended use. During the audit, selected procedures, formats and records were reviewed and found to be adequately controlled and maintained. Documents Reviewed: BRBA-DCP-01 Document Control Procedure; BRBA-MDL-01 Master Document List; BRBA-MRL-01 Master Record List; BRBA-DCR-01 Document Change Record; BRBA-QM-01 QMS Manual.
8.1.	**Operational planning and control**	**C**	The organization has planned and controlled activities related to bridge girder and steel structure fabrication, including material receipt, cutting, fit-up, welding, assembly, inspection, handling, storage and dispatch. Required drawings, specifications, process parameters, acceptance criteria, resources and inspection stages are defined before execution. During the audit, selected production planning, fabrication and inspection records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-PPCP-01 Production Planning & Control Procedure; BRBA-PP-01 Production Plan; BRBA-WI-01 Work Instructions; BRBA-FCR-01 Fabrication Control Record; BRBA-IPR-01 In-Process Inspection Record.

8.2.	**Requirements for products and services** **8.2.1 Customer communication** **8.2.2 Determining the requirements for products and services.** **8.2.3 Review of the requirements for products and services.** **8.2.4 Changes to requirements for products and services.**	**C**	The organization has established controls for customer communication, identification and review of product requirements, and management of changes. Customer requirements relating to drawings, dimensions, material grades, welding specifications, inspection criteria, quantity and delivery are reviewed before order acceptance to ensure capability to meet the requirements. Any changes in customer specifications, drawings or order requirements are reviewed, approved and communicated to relevant departments before implementation. During the audit, selected enquiries, quotations, purchase/work orders, drawings and order review records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-CCR-01 Customer Communication Record; BRBA-CRR-01 Customer Requirement Register; BRBA-QTN-01 Quotation Record; BRBA-ORR-01 Order Review Record; BRBA-OCR-01 Order Change Record; BRBA-DR-01 Drawing Register.
8.3.	**Design and development planning** **8.3.2 Design and development planning.8.3.4 Design and development controls..** **8.3.5 Design and development outputs.** **8.3.6 Design and development changes**	**C**	The organization plans and controls design and development activities related to bridge girders and steel structures based on customer drawings, technical specifications and applicable fabrication requirements. Design responsibilities, review stages, verification requirements and acceptance criteria are defined. Design outputs such as drawings, dimensions, material specifications and fabrication details are reviewed before release. Any changes to drawings or design requirements are identified, reviewed, approved and communicated to relevant departments before implementation. During the audit, selected design, drawing review and change-control records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-DDP-01 Design & Development Plan; BRBA-DDR-01 Design Review Record; BRBA-DVR-01 Design Verification Record; BRBA-DDO-01 Design Output Record; BRBA-DCR-01 Design Change Record; BRBA-DR-01 Drawing Register.
8.4.	**Control of externally provided process products and services** **8.4.2 Type and extent of control** **8.4.3 Information for external providers**	**C**	The organization has established controls for externally provided materials, products and services. Suppliers and subcontractors are evaluated based on capability, quality performance, delivery, technical requirements and past performance. The extent of control is determined according to the impact of supplied materials or services on final product conformity. Purchase orders and technical documents communicate applicable requirements such as material grade, dimensions, specifications, inspection criteria, delivery conditions and required certificates to external providers. During the audit, selected supplier evaluation, purchase and incoming inspection records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-SEP-01 Supplier Evaluation Procedure; BRBA-ASL-01 Approved Supplier List; BRBA-SER-01 Supplier Evaluation Record; BRBA-PO-01 Purchase Order; BRBA-IIR-01 Incoming Inspection Record; BRBA-MTC-01 Material Test Certificate Register.
8.5.	**Production and service provision** **8.5.1 Control of production and service provision.** **8.5.2 Identification and traceability.8.5.3 Property belonging to customers or external providers.** **8.5.4 Preservation.** **8.5.5 Post-delivery activities.** **8.5.6 Control of changes**	**C**	The organization controls bridge girder and steel structure fabrication through approved drawings, work instructions, welding requirements, qualified personnel, inspection stages and suitable equipment. Material and fabricated components are identified through job, heat, batch or marking references to maintain traceability. Customer or external-provider property, including drawings, materials or documents, is identified and protected while under organizational control. Fabricated items are preserved through suitable handling, storage, protection and dispatch arrangements. Applicable post-delivery requirements and customer feedback are addressed, while production or specification changes are reviewed and authorized before implementation. During the audit, selected fabrication, traceability, preservation and change-control records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-FCR-01 Fabrication Control Record; BRBA-TR-01 Traceability Record; BRBA-CEPP-01 Customer / External Provider Property Register; BRBA-PSR-01 Preservation & Storage Record; BRBA-PDA-01 Post-Delivery Activity Record; BRBA-PCR-01 Production Change Record.

8.6.	**Release of products and services**	**C**	The organization controls bridge girder and steel structure fabrication through approved drawings, work instructions, welding requirements, qualified personnel, inspection stages and suitable equipment. Material and fabricated components are identified through job, heat, batch or marking references to maintain traceability. Customer or external-provider property, including drawings, materials or documents, is identified and protected while under organizational control. Fabricated items are preserved through suitable handling, storage, protection and dispatch arrangements. Applicable post-delivery requirements and customer feedback are addressed, while production or specification changes are reviewed and authorized before implementation. During the audit, selected fabrication, traceability, preservation and change-control records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-FCR-01 Fabrication Control Record; BRBA-TR-01 Traceability Record; BRBA-CEPP-01 Customer / External Provider Property Register; BRBA-PSR-01 Preservation & Storage Record; BRBA-PDA-01 Post-Delivery Activity Record; BRBA-PCR-01 Production Change Record.
8.7.	**Control of nonconforming outputs**	**C**	The organization has established controls to identify, segregate, record and disposition nonconforming materials, fabricated components and finished steel structures to prevent unintended use or delivery. Nonconforming outputs are handled through correction, rework, repair, rejection or return to supplier as applicable, followed by re-inspection before acceptance. During the audit, selected nonconformity, rework and disposition records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-NCP-01 Nonconforming Product Procedure; BRBA-NCR-01 Nonconformity Report; BRBA-RWR-01 Rework / Repair Record; BRBA-NCRG-01 Nonconforming Output Register; BRBA-CAR-01 Corrective Action Record.
9.1.	**Monitoring, measurement, analysis and evaluation** **9.1.2 Customer satisfaction.** **9.1.3 Analysis and evaluation**	**C**	The organization monitors QMS performance through fabrication quality, welding defects, dimensional compliance, delivery performance, customer feedback, complaints and achievement of quality objectives. Customer satisfaction is evaluated through feedback, repeat orders and complaint trends. Relevant quality and process data is analyzed to identify performance trends, recurring issues and opportunities for improvement. During the audit, selected monitoring, customer satisfaction and analysis records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-PMR-01 Performance Monitoring Record; BRBA-CSF-01 Customer Satisfaction Feedback; BRBA-CCR-01 Customer Complaint Register; BRBA-DAE-01 Data Analysis & Evaluation Record; BRBA-QOM-01 Quality Objective Monitoring Record.
9.2.	**Internal audit (Mentioned)** **Internal Audit Plan:** **Internal Audit Date:** **No. of Internal Auditors:** **Area's and Department Covered:** **Total NC's and Observation:** **Current Closure Status:** **Verification of Corrective Action:** **Effectiveness of Internal Audit /Corrective Action:** **Next Internal Audit Plan: and Frequency:**	**C**	Internal Audit Plan: 18-Dec-2024 Internal Audit Date: 26-Dec-2024 Areas and Departments Covered: Management, QMS, Sales & Order Review, Procurement, Stores, Fabrication, Cutting, Welding, Assembly, Quality Control, Maintenance, Warehouse, Dispatch, HR / Administration and Document Control. Total NCs and Observations: 00 NC and 01 Observation. Current Closure Status: No nonconformity was identified. The observation was reviewed by the concerned department and the required improvement action was completed. Verification of Corrective Action: Not applicable for NC, as no nonconformity was raised. Action taken against the observation was verified through relevant records and process checks.

9.3	**Management review** **9.3.2 Management review inputs.8** **9.3.3 Management review outputs** **Management review-Mentioned** **MRM Notice:** **MRM Date:** **Participants:** **Decision:** **Continual Improvement:** **Responsibility:** **Timeline to Complete Decision/Continual Improvement Plan:** **Next MRM Due Date and Frequency:**	**C**	MRM Notice: ONE MONTH MRM Agenda:Review of quality policy and objectives, customer satisfaction and feedback, service performance and process effectiveness, internal audit results, nonconformities and corrective actions, supplier performance, resource adequacy, risk and opportunities, compliance requirements, and opportunities for continual improvement. MRM Date: 15-Jan-2025 Participants: Top Management, Management Representative and concerned Process Heads. Decision: Continue the effective implementation of the Management System and take necessary actions for identified improvement areas. Continual Improvement: Improve process effectiveness, strengthen controls, monitor performance and address any identified gaps through appropriate corrective actions. Responsibility: Management Representative and respective Process/Department Heads. Timeline to Complete Decision/Continual Improvement Plan: Actions shall be completed as per the agreed action plan and within the defined target dates. Next MRM Due Date and Frequency: Next Management Review Meeting shall be conducted as per the approved annual plan, normally once a year.
10	**10.1 Improvement** **10.2 Nonconformity and corrective action.** **10.3 Continual improvement**	**C**	The organization identifies improvement opportunities through internal audits, customer feedback, process performance, quality issues, inspection results and management review. Nonconformities, when identified, are corrected, root causes are determined and suitable corrective actions are implemented and reviewed for effectiveness. Continual improvement is focused on reducing fabrication defects, improving welding and dimensional accuracy, strengthening supplier performance, improving process control and enhancing customer satisfaction. During the audit, selected corrective action and improvement records were reviewed and found to be adequately maintained. Documents Reviewed: BRBA-NCR-01 Nonconformity Report; BRBA-CAR-01 Corrective Action Record; BRBA-RCA-01 Root Cause Analysis Record; BRBA-CIR-01 Continual Improvement Register; BRBA-MRM-01 Management Review Minutes.

RECOMMENDATION (Yes/No)	
The Management System complies with the requirements of the reference standard, Confirmation of Client scope found appropriate & Audit objectives are fulfil during the audit.: Congratulations, on the basis of the above summary, Lead Auditor is pleased to put forward a recommendation after conduct **Stage2 / ___Survillance / Recertification** Audit for applicable **ISO Certification.**	**YES**
The Quality Management System complies with the requirements of the reference standard & Confirmation of Client scope found appropriate & Audit objectives are fulfil during the audit with exception of minor NC: Congratulations, Lead Auditor is pleased to put forward a recommendation for **Certification**, upon off-site verification of closure of all issues within 60 days from the date of Stage 2 audit. Responses to the non-conformances should be submitted to QCC and must include supporting evidence of closure to allow for off-site verification. In responding to the non-conformances, the organization should consider the root cause of the non-conformance and the potential for related issues in other parts of system. If all non-conformances are not closed within 60 days, a full reassessment/additionally assessment may be required.	**YES**
Evidence of major non conformities: Organization is **not recommended for Certification** at this time. A follow-up assessment will be scheduled to allow for on-site verification and closure of all issues within 60 days from the date of Stage 2. Once all non-conformances are closed, the recommendation for Certification may be made. Responses to the non-conformances should be submitted to QCC within 45 days and must include supporting evidence. In responding to the non-conformances, the organization should consider the root cause of the non-conformance and the potential for related issues in other parts of system. If all non-conformances are not closed within 60 days, a full reassessment may be required.	**NO**

Not Recommended: Organization is recommended for Suspension / Withdrawal / __Surveillance / SCE-Certification of current Certification. Additional Stage audit will be required, if Organization want to make statues Certified with Concern ISO Standard.	
Results of the evaluation of management system documents and their implementation	
I carried out this audit as above and submit this report to QCC report reviewer. I hereby submitted the audit report of organization and my recommend for:	**Certificate Continue**
Reduce/Extend Scope of standard certificate to above mention organization.	**N/A**
Auditor	**Ankit Lal**
